## Work experience

2019 – PRESENT

### **Application Developer** **Accenture Flex**

- Design, development, and delivery of full-stack AWS cloud-based call center applications
- Ensure high-quality code is delivered and uphold coding standards and guidelines provided by the Client
- Automating system build-outs and the application deployment process
- Monitor existing infrastructure and architectural frameworks for performance
- Develop architectural blueprints, along with descriptive documentation for all stakeholders
- Work within the Change Management process to raise, build, and test changes
- Lead development team in designing/migrating AWS cloud-based solutions
- Track record of taking initiative and producing results

2016 – 2019

### **Multimedia Designer / Web Developer** **Independent Contractor**

- Update and enhance UI/UX for small local businesses and projects for independent eCommerce shops
- Writing high-quality code in HTML5, CSS3, JavaScript and JavaScript frameworks/libraries (jQuery, etc.), CSS preprocessing platforms (SASS), Responsive web design
- Understanding client needs, requirements and expectations and advising solutions accordingly
- Design a wide range of marketing materials (ads, logos, web graphics, videos)
